 [Forward to a Friend](#)

### A Message from the Chairman

I am delighted that OGM Technical Institute has initiated this newsletter to ensure our partners, supporters and friends are informed of our activities as well as provide a platform for the sharing of information and knowledge.

Outlining OGM philosophy, strategy and the benefits that we can provide to the members of FIMI, the presentation was well received with members showing interest to become industry partners and to have OGM deliver tailor made courses for their staff.

We highlighted our partner, Institute of Natural Resources

OGM Technical Institute has

(INR - Gurgaon) having installed the first underground simulated mine in India designed for skills development and induction short courses. Several FIMI members have since visited the facility

**FIMI, which came into existence** with a small membership of about 40 federating associations and individual units, is now a 400-member body. FIMI envelopes in its fold mining, mineral processing, metal making, cement and other mineral-derived industries as well as granite, stone, marble and slate industries — private, joint and public sectors - of the country. It represents the entire non-fuel mining and mineral processing activities of the nation.

**OGM and VETASSESS Partnership**

OGM has finalised an agreement with VETASSESS, Victorian Government Owned Registered Training Organisation to

Showcasing the “First of it’s kind” simulated underground mine in India, OGM partner, the Institute of Natural

been established to create and supply, workplace ready trainees who meet immediate industry requirements. Current estimates place global skilled labour shortages at approximately 10 million positions worldwide, with expectations of this number rising to 95 million by 2020.

We are exporting the very best of experience and training to the world. We combine on-site experience with in-classroom technical training to ensure our trainees recognise and understand the real industry needs of a company. Our trainees understand the technical skills, worksite awareness and practical capabilities required to be completely work-ready and productive from day one.

OGM Technical Institute currently provides employment pathways to the global NSH network as well as to companies seeking training solutions and access to skilled workers. Employment opportunities for its new graduates can stretch to India, South Asia, the Gulf and Pacific regions, and within Australia to help to meet skilled workforce demands.

partner OGM in the delivery of courses internationally, and importantly to have all programs tightly managed for quality and accredited qualification of skills for successful OGM graduates.

VETASSESS is recognised internationally for excellence in the delivery of assessment services to a range of clients including businesses, industry organisations, RTOs and state, national and international government agencies.

Resources is delivering courses for leading global mining company, Rio Tinto in India.

The course provides training on “Mining for non-miners” covering all aspects of mine development and operation and includes time for all participants within the simulated mine with awareness of safety process, equipment, and to see mining equipment in place as operated in real mine situations.

With the installation of new equipment in their underground simulated mine, this now enables INR now to deliver short courses for the mining industry and the photograph above shows Steve Waugh being given a briefing and tour of the simulated mine.

We are committed to enhancing skills, for industry and to deliver better employment opportunities for OGM graduates.

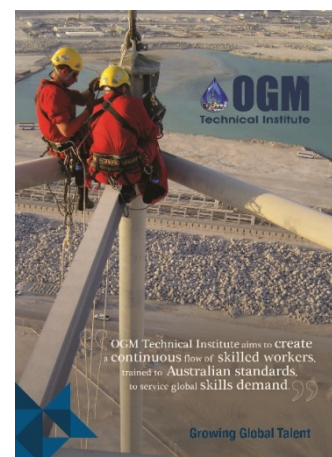

Yours sincerely,

Dr Ravi Pillai
