[Limited](#) for the delivery of skilled courses in India. IL&FS Skills will initially start with a Pilot Program with Master Trainers from the Philippines, running 2 courses (one in New Delhi and the other in Chennai) from which courses will be expanded in 2014.

IL&FS CEO Arunkumar Pillai says "IL&FS Skills is pleased to partner OGM in offering skills training programs mapped to Australian Qualifications Framework (AQF). We believe training to AQF standards... [\(continue\)](#)

OGM Institute Partner, Institute of Natural Resources (INR) delivers one day course "Mining for Non-Miners" for Rio Tinto India

For the first time in India, OGM through its partner, [Institute of Natural Resources](#) has delivered an exclusive one-day program for Rio Tinto India. The "Mining for Non-Miners" program for over 40 Rio Tinto India non-mining executives, covered key areas of the mining cycle including the stages in the life of a mine, underground mining: development, production, ground support, load and haul ventilation, open pit mining, design (drill and blast, load and haul, equipment), basic capital and operating costs, an understanding of pre-feasibility and feasibility studies, planning parameters and key terminology and mineral processing.

Also included in the program for all participants was time at INR's simulated underground mine. This provided participants the experience to be in an underground mine and see some of the equipment that is used for mining. The aim was to familiarise Rio Tinto's India non-mining staff with these key mining areas, thus enabling them to better serve their customers – both internal and external. The program was well received by the participants

“Would have liked to spend more time in the simulated mine.”

“The environment was very friendly and welcoming and the session was fruitful.”

“A great concept that has got a huge potential in light of India growing.”

Participants in the simulated underground mine, at INR Institute.
